Projects

Weather App | https://github.com/Angied521/weather **|** https://angied521.github.io/weather/

- In this project I connected to the openweather.org API to create a current weather forecast and a five-day forecast.

- I made more than one ajax call, stored to the local storage. Also used CSS for a nice polished look.

- I used Html, CSS, JavaScript, jQuery, Ajax Call and API.

Travel Insights | https://github.com/Angied521/travel-insights **|** https://angied521.github.io/travel-insights/

- In this project our group made an app for traveling. Upon entering the city traveled to: a current weather forecast, google map with activity search and some fun facts from Wikipedia would appear.

- My core responsibility was to create the google map city and search.

- Html, CSS, JavaScript, jQuery and APIs were used.
